of Our Star Screen

EUREC

WE KNOW HOW.

我们独特功能的星盘筛 Unique Selling Features of Our Star Screen

可用于堆肥后的材料筛分，废旧木材、锯削、泥炭、焚烧残渣的筛分，以及机械生物预处理等方面 / Used for the treatment of finished compost, waste wood, wood chips, turf, ash, mechanical-biological processing.

根据客户需求，可调节筛分的粒径调节在 8 - 80 mm 之间
For the screening of fine particles from 8 - 80 mm. Individual configuration according to customer specifications.

特殊几何形状的星盘（取决于筛分的材料）安装于可旋转的驱动轴上：保证无堵塞、最佳的筛分结果以及高效的处理量

Stars with special geometry (dependent on material) mounted on spinning shafts: no clogging, optimized screening result and high throughput.

不同长度的筛板，可根据预设的参数（处理量）进行匹配
Different screen deck lengths to adjust the screen to specified conditions (throughput).

可倾斜 18° 的筛板：使材料被多次抛起并强力加速，得到最佳的筛分效果

Screen deck inclination up to 18°: material is thrown up again and again and greatly accelerated for screening result optimization.
